(54) REMEDY FOR DERMATOPATHY FOR EXTERNAL USE

(57)Abstract:

PURPOSE: A remedy for dermatopathy for external use contains indomethacin as an active ingredient to show high curative effect by direct application to affected parts of dermatopathy such as dermatitis, humid tetter, psoriasis, zona, skin ulcer or bed sore.

CONSTITUTION: Indomethacin is contained, preferably by 0.5W5.0wt%, preferably further a release improver selected from monohyric alcohols, polyhydric alcohols, fatty acid esters, surface active agents, essential oil and crotamiton is contained to give a remedy for dermatopathy for external use, especially an ointment, that shows remarkable effect against contact dermatitis, atopic dermatitis, psoriasis vulgaris, acute or chronic humid tetter, zona, bed sore, solar dermatitis, radiation ulcer, burning ulcer. The resultant remedy is stable for a long period of time, not irritative to skin, further it can be applied directly to the affected part and so, it develops high anti-inflammatory and analgesic activity even when a smaller amount is applied than conventional one.
